

Nemko Direct for Telecom

This program is based on a network of relationships with regulatory authorities throughout the world. Our network includes countries located in the Americas, the Far East, the Middle East, Africa, Asia, Europe, Eastern Europe and Oceania.

How Nemko Direct for Telecom Works:

Market access service

The process of obtaining the necessary approvals to deliver wireless products to the world market is complex. The Nemko Direct for Telecom service will be your partner through the process of obtaining certificates and approvals. Nemko Direct for Telecom can assist you in accessing over 150 countries.

Mandatory certification

Most countries still have mandatory certification requirements for telecom and radio appliances. This means products must be approved in the respective country before being imported and sold. Nemko has relationships with approval bodies and authorities involved to avoid retest where possible. Because of the expertise and experience of Nemko you will save time and cost.

Issuing of declarations that no certificate is needed

Even if a product does not need certificates, this may not be understood by customs inspectors. It might also be necessary to show partners and customers in the market or country you are seeking to sell that a specific product does not require a certificate. To avoid these problems we can write a declaration to demonstrate that your product does not require certification.

Testing worldwide

Nemko has more than 80 years experience in testing of electrical equipment, materials, and components, and offers a wide range of testing and related services in the European, North American and Far Eastern laboratories. Testing is according to relevant international and national standards for electrical safety, EMC, telecommunication and environmental parameters. Nemko offers testing with a high level of quality as well as "one-stop-shopping", short lead times, competitive prices and use of the most modern technology and information systems available.

Nemko Direct for Telecom offers faster market access to different countries through:

- Acceptance of valid test reports, which minimizes time, cost and retesting
- Complete project management including handling applications and communications, collecting necessary documentation and follow-up
- First hand knowledge and understanding about regulatory requirements and processes
- Dedicated professionals who stay current with the requirements for worldwide market access
- A high level of technical competence

By choosing Nemko Direct for Telecom you receive the following advantages:

- Working with a company that can provide market access for wireless products in over 150 countries
- The burden of application, follow-up and communication with local authorities is taken care of
- Nemko has experienced professionals who know what to do and how to do it
- Consolidation of worldwide market access management
