

Other

[1]

[Lighting equipment](#) [1]

Our wide scope of testing capabilities covers all ranges of luminaires. From simple table lamps to advanced street lamps or emergency lights.

[2]

[Installation materials](#) [2]

Installation products are critical products anywhere in the world. To make sure these fulfil the requirements and are certified where this is required, Nemko are ready to help you.

[3]

[Management system certification](#) [3]

Having a certified management system is often a precondition to be in a position to win contracts in many business sectors as well as public sectors.

[4]

[Building inspection](#) [4]

For many buildings (like shopping centres, garages, hotels etc.) there are numerous requirements either by law or from the insurance companies.

[5]

[Fire & security](#) [5]

Nemko provides fast European market access for products of fire detection and fire alarm systems. Type testing, certification and factory inspection services under the Construction Products Regulation are offered from our Norwegian office.

At the same time; take benefit from our broad scope of services and have your products tested for all relevant directives and standards at once, in the same laboratory.
