

CB statement for compliance with RoHS

This service is restricted to testing and issuing statement for the presence of hazardous substances:

- Cadmium (Cd)
- Lead (Pb)
- Mercury (Hg)
- Hexavalent Chromium (Cr(VI))
- Sum of PBBs
- Sum of PBDEs

The HSTS is most suitable for components and materials and is not meant for end products.

Why use this CB scheme HS Testing Service?

- The requirements for hazardous substances vary in different regions and countries around the world.
- Laboratories also use different test methods that provide varying test results.
- Market surveillance on the use of HS (Hazardous Substances) is intensifying.
- Getting an internationally recognized Statement of Testing Results

Based on testing, Nemko as the NCB will issue a statement of test results.

Related information

Testing are performed according to the IEC 62321-series.
