22. Domestic lighting part II “directional lamps”
23. Domestic and commercial ovens
24. Domestic and commercial hobs and grills
25. Non-tertiary coffee machines
26. Networked standby losses of energy using products

Several of these categories are so-called horizontal requirements meaning they cover a lot of different products.

Example on this is the standby regulation which cover almost all products for household and office use.

It is the first directive to cover a product’s total life cycle, often called ‘from cradle to grave. The different product regulation can include requirements for the following product stages:

- Raw Material Acquisition
- Manufacturing
- Transport and Trade
- Use/ Maintenance
- Reuse/ Recycling/ End of Life Treatment

The European directive for energy related products 2009/125/EC are expended with tree to five new product categories per year and are now projected to save 16% of EU’s electricity consumption by 2020.

Contact Nemko for what this means for your product.
