Elected into IEC’s Conformity Assessment Board

Friday, November 21, 2014

The Board consists of 12 members elected for a 3 year term and is responsible for conformity assessment affairs within IEC. Thus, it is the superior management body for IEC’s present four conformity assessment systems, i.e.

- The **IECEE**; operating the very successful CB scheme for certification of electrical products in general.
- The **IECEx**; the fast growing scheme for certification of explosion protected electrical equipment and also associated workshops and personnel.
- The **IECQ**; the well-established scheme for certification of electronic micro-components and system for hazardous substances management.
- The **IECRE**; the recently established conformity assessment system for renewable energy equipment and systems (concerning solar-, wind-, wave energy).

Trond is now Senior Corporate Advisor to the Nemko Group management, stationed at Nemko’s head office in Oslo, Norway. Until official retirement last year, he was Senior Vice President of the company with responsibility for international cooperation. He has more than 30 years of experience with conformity assessment activities in different industrial contexts both in Norway and internationally. Since 2004 he has been Chairman of the Board of NEK (the electrotechnical standards body in Norway) and thereby President of the Norwegian Member Body of both IEC and the European CENELEC, representing Nemko, NEK and Norway in different forums concerning standardization and conformity assessment at European- and international levels.
