

Maritime, oil & gas

Nemko is an accredited test laboratory according to the standard EN ISO/IEC 17025 and a certification body according to EN 45011. Nemko is a highly recognized body for testing and certification in the oil and gas industry, and offers a full service scope for products.

Our services include pre-compliance, international approval, test and certification for:

- Maritime
- EX
- Subsea
- Offshore

When launching a new product, you need to comply with international approvals and industrial driven requirements.

Nemko offers comprehensive services suited to cover your specific needs. We have a tailor-made industrial approach coupled with a solid project management model, serviced by encompassing and devoted people around the Nemko globe.
