

# Nemko customer receives prestigious award from The Research Council of Norway

Wednesday, August 15, 2018

Three years ago, the CEO and Co-founder Henrik Schumann-Olsen contacted Nemko to get a couple of advice regarding the testing and certification process of their newly developed camera.

At that time they were two employees and settled with a small office in Startuplab's premises at the Research Park in Oslo. In a short period of time, the company evolved to become the leading provider of 3D cameras and software solutions for automated machine and computer vision applications and they have received several international prizes, such as "Top Innovation" from inVISION Magazine, "Gold Honoree 3D Camera" from Vision Systems Design and Reddot Award for Product Design.

Today, Zivid Labs is located in brand new and high tech premises in Nydalen in Oslo, and by the end of the year, they will have 30 employees.

We in Nemko are very proud to have contributed to this success story and the market access of such a unique product.
