

## Webinar: Cyber Security for IoT products

Date:  
Oct 27 2020  
Time:  
9:00-10:00 AM (CEST) / 3:00-4:00 PM (CST)  
Place:  
Anywhere (webinar)  
Language Undefined

Thus, more countries and governments have started to demand IoT cyber security requirements. These security requirements will make the product less prone to cyberattacks and help protect personal data.

From a marketing perspective, certification can give companies that certify their IoT products an advantage a competitive advantage.

This webinar provides a quick introduction to IoT and cybersecurity, and includes subjects such as:

- Cyber challenges we face today
- New challenges due to IoT
- Standards and national requirements
- EU cyber security act
- ETSI/EN 303 645, "Cyber security for consumer IoT"
- Nemko's cybersecurity services

Attend the webinar to get a better understanding of what you and your company will need to prepare to stay compliant.

The webinar is relevant for everyone who works with IoT products and would like to get a better understanding of the available standards and requirements which can prevent cyber attacks.
