

Information technology and Audio-Video equipment

For more information, [click here](#) [1].

Nemko India is recognised by Bureau of Indian Standard (BIS) (OSL– 8138426) for safety testing of your IT Equipments and Audio/Video Equipments (IT/AV) as per IS 13252-1/IEC 60950-1 and IS 616:2017/IEC 60065 respectively. Test report issued by our laboratory can be used to gain BIS registration of your product.

Apart from BIS registration, our pre-compliance service (through safety testing / inspection as required) for information technology and Audio/Video products will assist you in getting your product to international market in the shortest possible time. By providing advice on the relevant compliance issues early in your new product development cycle we will help you to avoid costly and time-consuming redesigns at the later stages of product development. Our wealth of experience and in-depth knowledge of the EN/IEC 60950-1 and 60065 safety standards (IT/AV) (to do safety testing) make our pre-compliance service effective.

Our laboratory is also accredited by NABL for IEC 62368-1 (hazard based) which covers safety requirements for Audio/video, information and communication technology equipment and will replace legacy standards 60065 and 60950-1 in Europe by December 20,2020.

For manufacturers, it is an advantage to be an early adopter of the new standard (IEC 62368-1) as it gives the possibility to reduce cost through R&D. As an early adopter we can also help you with discovering potential nonconformities in your products, components / sub-assemblies (through safety testing) with regards to the new standard. Manufacturers stand better chance to be chosen by purchasers as preferred vendors if their products comply with 62368-1 in addition to 60065 & 60950-1.

How Nemko can help :

1. Provide [pre-compliance](#) [2] testing requirements during the design and development phase
2. Support you with reduction of time to market.
3. One-stop solution for global [market access](#) [3] (outside India)
4. If you in India and planning to sell your electrical or electronic products in North America then being [NRTL](#) [4] approved lab, Nemko India take you through the quickest and most cost-effective route for market access.

For more information about how Nemko can help your organization for your audio/video, IT and communication products safety testing , write us at india@nemko.com [5] / anshuman.dash@nemko.com [6]
