

Industrial Machinery Assessment and Inspection

As global economies continue to expand, with the discovery of new technologies, the demand for printing, paper, food, textile & other industrial machinery is growing. Considering applicable regulations directives, our assessment will minimize machine defects & maximize in-compliance of your machinery & industrial machinery to comply with the Machinery Directive 2006/42/EC for CE marking Machinery Directive. Reports & Certificates issued by us are internationally recognized which displays the manufacturer's commitment to high-quality standards. As an accredited test lab for machinery and industrial equipment for CE Certification according to Machinery Directive, we are a big player in industrial machine inspection, CE marking machinery directive for testing & verification.

How Nemko can help :

1. Support you with new product development
2. Support you with worldwide market access (excluding India)
3. Support you with reduction of time to market

Our test inspection facilities for machinery and industrial equipment (Machinery Directive 2006/42/EC for CE marking)) include but not limited to:

1. Control function
2. Determination of limits of machinery
3. Documentation of risk assessment & risk reduction
4. Electrical motors & associated equipment
5. Earth resistance
6. Hazard identification
7. Inherently safe design measures
8. Protection against electric shock, etc.

Our machinery assessments are based on CE marking Machinery Directive and regulations and include:

- EC type examination for machines under Annex IV of the Machinery Directive as Notified Body for CE marking
- Conformity Assessment for products in the scope of the CE marking Machinery Directive

Inspections are tailor-made for your company and your machines. Some of the tasks we carry out are:

- Check for ergonomics, ease of operational use, and service
- Assessment of functional safety of control systems

Our support extends beyond direct inspection of machinery/industrial machinery. We can provide:

- Support while compiling risk analysis and risk assessments
- Support with new developments and modifications

The government of India is in process of regulating mandatory safety requirements for machinery & has released a draft OTR (Omnibus Technical Regulation). Soon the final notification will be released. For the latest notifications & circulars, please refer [here](#) [1]

For more information about how Nemko can help your organization with Industrial Ce marking machinery Certification as per applicable directive, [contact us](#) [2] or mail us at india@nemko.com [3] / anshuman.dash@nemko.com [4] or give us a call at +91-9205690574 .
