

Management System Certification ISO

We deliver certification services in a number of areas as below :

1. [ISO 9001 - \[1\]Certification](#)

ISO 9001:2015 is the quality management system standard designed to create a more efficient and effective business operation. Certification of the quality management system is a confirmation from an independent, competent, and accredited agency that the business adheres to the requirements of an internationally recognized quality management system standard.

2. [ISO 14001 - Environmental Management System](#) [2]

ISO 14001:2015 helps the organization manage its environmental aspects and is fundamental for environmental improvements. Certification of this environmental management system is an effective means to achieve credibility. It has been shown that certification to ISO 14001 helps in achieving market access in areas where a good reputation related to environmental awareness is important and where effective environmental management is a criterion for being approved as a supplier.

3. [ISO 50001 - Energy Management System](#) [3]

ISO 50001:2018 helps the organization manage its energy aspects and is fundamental for energy improvements. Certification of this energy management system is an effective means to achieve credibility. Making buildings more energy-efficient cuts costs offers market-beating investment returns, and protects companies from rising energy prices. It is also important where effective energy management is a criterion for being approved as a supplier.

4. [ISO 22000 - Food Safety Management System](#) [4]

ISO 22000:2018 is the food safety management system standard where an organization demonstrates its ability to control food safety hazards to ensure that food is safe for human consumption. ISO 22000:2018 is applicable to all types of organizations, regardless of size, which is involved in any aspect of the food chain.

5. [ISO 45001/ OHSAS 18001 – Occupational health and safety](#) [5]

Occupational Health Safety Assessment System (OHSAS) 18001 is an international standard for occupational health and safety management systems. In 2018 the new standard for occupation health and safety ISO 45001 was released. ISO 45001:2018/ OHSAS 18001:2007 is a combined management system for the working environment and safety similar to what is used for quality assurance within a company.

6. [ISO 27001 - Information security management system](#) [6]

ISO/IEC 27001:2017 is the information security management system standard designed to specify the requirements for the implementation of security controls within an individual organization. It also covers physical control and IT security issues.

7. [IQNet The International Certification Network](#) [7]

Nemko AS is the only Norwegian member of the IQNet - The International Certification Network. IQNet is the central body representing 36 national and international certification companies with a network of more than 200 subsidiaries worldwide. The IQNet certificate grants to customers the use of IQNet exclusive registered mark, which is known around the world as a synonym of Quality.

8. [ISO 22301 - Business continuity management systems](#) [8]

NS-EN ISO 22301:2014 - Societal security - Business continuity management systems (BCMS)
