Updating of Chinese EMC standard for compulsory product certification

Sunday, July 14, 2013

According to the governmental SAC Bulletin No. 41-2012, the current CCC EMC test standard GB17625.1-2003 has been updated in a new edition GB17625.1-2012, being effective from 1 July this year.

The standard is equivalent to the international IEC61000-3-2:2009: Electromagnetic compatibility - Limits for harmonic current emissions (equipment input current ≤ 16 A per phase).

The new standard applies to the following types of products within the scope of the mandatory Chinese CCC scheme: IT, telecom, audio/video, household appliances, and electrical motor tools.

Nemko China will help customers to obtain updated CCC certificates in due course.
